INNOVATIVE DESIGNS.**

The Markosky Engineering Group, Inc.

Career Opportunity

Environmental Project Engineer

Markosky is looking to grow our team and is searching for **mid-level engineers** with a passion for water resources and green infrastructure design, including erosion control, stormwater management, hydrologic and hydraulic analysis, drainage design, trail design and stream/wetland design. We have become the GO TO firm for obtaining project permits, preparing E&S and PCSM plans, stream and wetland mitigation design, energy services design, and H&H reports. We have several large and exciting projects in our queue and are hiring experienced and committed professionals who are passionate about the environment and want to be a key component of our Environmental Engineering Team! If chosen, you will learn from the experts in their field and will be part of something special!

ABOUT US

Markosky is a full-service Environmental, Engineering, and Construction Services firm. We provide services in environmental science and engineering, archaeology, historic structures, construction inspection and management, transportation and structural engineering, bridge inspection and site development.

WHY CHOOSE A CAREER AT MARKOSKY

- We are dedicated to the growth of each employee and have a [Professional Development Program](#) in place to guide each employee through the steps in their career.
- We offer a hybrid work week schedule, unique to each position.
- Full-time positions come with a competitive benefits package. **See details on following pages.**

> **Experience**
5-10 years

> **Job Type**
Full-time

> **Annual Salary**
\$80,000 based
on experience

Essential Functions

- Apply knowledge of engineering principles and practices to a broad variety of environmental and water resources design assignments associated with transportation, energy, green infrastructure, and various other site development projects
- Perform design activities for E&S, site drainage, post construction, stormwater management, and stream and wetland mitigation using CADD software
- Perform hydrologic and hydraulic analyses
- Prepare permits, plans, specifications, and cost estimates
- Serve as a mentor for entry level engineers
- Occasional on-site field work, including testing, construction oversight, and data gathering

Knowledge / Job Requirements

Knowledge

- Working knowledge of CADD, including Microstation and AutoCAD, with a focus on 3D grading using AutoCAD Civil3D and Open Roads Designer
- Stormwater basin modeling experience using HydroCAD or similar
- HEC-RAS Software for hydraulic modeling, preferred knowledge of GeoHEC-RAS software
- Microsoft Office (Excel, Word, Teams, etc.)
- GIS knowledge is a bonus (ArcGIS or equivalent)
- Stream and wetland mitigation design
- Knowledge of engineering principles, design standards and codes, including the following:

APPLY NOW

- NPDES Permitting and ESCGP Oil and Gas Permitting (PA, OH, and WV specific knowledge preferred)
- Waterway Permitting
- PA Stormwater BMP Manual
- PADEP E&S Manual
- Organization and planning
- Work independently
- Oral and written communication

Job Requirements and Qualifications

- Professional Engineer License (Preferred)
- Engineer In Training Certification (Preferred)
- Engineering: 5 years (Required)
- Bachelor's (Required)
- Environmental Engineering: 3 years (Required)
- Pennsylvania: Relocate before starting work (Required)

Skill Requirements & Perks

Required Skills

- Good oral and written communications required
- Ability to work in a team-oriented environment
- Ability to perform the field work required of the position

Flexible Daily Schedule Options

Available Schedules:

- (5) 8-hour days
- (4) 9-hour days and (1) 4-hour day
